Proper Banner Storage

The way the banner is stored when not in use is extremely critical to ensuring that it lasts as long as possible.

To Prolong the life of your banner, follow these simple guidelines:

1 Always keep the banner rolled - NOT FOLDED. Rolling the banner keeps it wrinkle-free and looking nice. When banners are folded the graphics become creased and the adhesive is stressed and can fail.

Roll the banner with the graphics to the inside, this protects the image from being damaged.

If available roll the banner onto a cardboard tube, this helps prevent the banner from being crushed.

2 Avoid storing in areas of extreme heat or cold, for example, near an oven, wood stove or heater, or in the trunk of a vehicle. When banners are exposed to extreme cold or heat the graphics may stick together or peel off.

3 Try to store the banner in a box. This will protect the banner from being crushed or smashed when in storage.
