

SIGNS / VEHICLE GRAPHICS

Vinyl & Magnetics Care

Washing Vinyl Applications

Hand wash your vinyls with a soft cloth and mild soap for best appearance and preservation.

If you must use a car wash system, please use the touchless type.

DO NOT use a hand-held power sprayer as they can loosen or damage the vinyl.

DO NOT use a bristle brush to scrub vinyl as this can scratch or damage the vinyl.

Proper Magnetic Care

When washing vehicle...

Clean magnet front

Make sure the vehicle area where the magnetics will be applied is clean and free of debris as any grit could scratch your vehicle if caught underneath the sign.

Hand wash sign with gentle soap and soft cloth, both sides, making sure magnetic side is free of any debris that could possibly scratch your vehicle.

DO NOT position over molding or strong body contours as air could get under the magnet and cause it to blow off during vehicle movement.
